

Fact sheet

COMMISSIONING

Smooth commissioning of your sorting facility lays the foundation for the success of your sorting processes. With our commissioning service, we ensure that your system works reliably and efficiently right from the outset. Our specialists take care of the professional commissioning, set the sorting performance based on the requirement profile and check all systems for proper operation.

We support your system's ramp-up, check the mechanical settings and monitor the sorting results according to the agreed sorting formulae. If required, our ramp-up service can be added to optimally support your system's ramp-up.

Our commissioning service creates the basis for efficient operation and high system availability from day one.

THE RESOURCE
SEARCH ENGINE

+ THE BENEFITS TO YOU

- + Determination of the sorting results
- + Assurance of a high level of system availability
- + Optimisation of service life
- + More efficient start up
- + Cost and time savings by avoiding additional on-site deployments
