

Fact sheet

RETROFITTING

If your sorting system has reached its technical limits or is no longer up to date, it's time for a targeted upgrade – without having to invest in a new device straight away. With our retrofitting service, we systematically check the condition of your sorting system components as well as their discontinuation status and compare the results with your operational requirements. We develop an individual modernisation solution or a replacement recommendation based on this. If required, we can provide a loan or replacement device for the transitional period.

THE RESOURCE
SEARCH ENGINE

+ THE BENEFITS TO YOU

- + Warranty of 1 year on the retrofit
- + Higher system availability
- + Reduced downtimes
- + Improved sorting results
- + Extended machine service life
- + More sustainable than new devices
- + Future-proof modernisation

+ SERVICE DESCRIPTION

STEINERT's retrofitting service includes the following services:

- + Recording the actual condition (function test as well as damage and wear recording)
- + Analysis of your company's requirement profile
- + Check of the discontinuation status
- + Preparation of a modernisation offer or a replacement recommendation
- + Provision of a loan or replacement device (depending on the component)
