

Fact Sheet

STEINERT.view®

STEINERT.view is a flexible and secure monitoring solution for STEINERT sensor sorting systems. It enables its users to easily visualize performance data, such as throughputs or operating states, to learn about the current performance of their own sorting system and its applications.

STEINERT.view allows a quick overview of the most important performance and

output data on the go. At the same time, however, complex interrelationships in process engineering can also be displayed. Filter functions help to maintain an overview.

In this way, problems in plant operation can be quickly identified and possible optimization potentials revealed.

+ FEATURES (EXCERPT)

- + Status overview of all connected sorting systems
- + Current performance at a glance
 - Sorting system detail pages with further information on
 - Material properties (composition, particle size distribution, material split, material flow)
 - Operation (belt occupancy, material distribution, compressed air consumption, valve activation)
 - Further statistics
- + Message lists for event analysis
- + Available in 6 languages (EN, DE, ES, FR, IT, PT)

TECHNICAL REQUIREMENTS

To use **STEINERT.view** the customer needs:

- + An internet browser
(MS Edge, Google Chrome, Safari)
- + An internet connection

On the sorting system side:

- + At least one STEINERT sensor-based sorting system,
- + That is equipped with STEINERT IoT-Ready package incl. software licence for STEINERT.dashboard
- + And for which the customer has agreed to a connection to the STEINERT cloud
- + And this connection has been made.
- + The sorting system needs to be permanently connected to the internet.
- + The firewall must be configured for outgoing MQTT messages.
- + No individual VPN configurations can be considered.

STEINERT.view

Prepare sorting system

All new sorting systems are IoT-Ready prepared

IoT-Ready package incl. software licence for STEINERT.dashboard as retrofit of existing sorting systems 9,600 € net plus service charge

Subscription period

12 months with 1-month notice period

Special right of termination within the first 3 months

You can find detailed contract information in our **"Digital T&Cs"**

STEINERT.view is fully GDPR-compliant, all details on this can be found in the **data protection declaration** and the **contract for commissioned data processing**

Subscription pricing

1st sorting system 1.174 €/a net

Any further sorting system 606 €/a net

3 users per sorting system are included per customer*

Supplementary package for 3 additional users 185 €/a net

Payment method

Payment by credit card (MasterCard, VISA, Diners Club, American Express)

Payment annually in advance

In the event of premature termination of the contract, the fees paid in advance shall be refunded on a pro rata basis.

**Example: A customer has integrated 4 sorting systems into STEINERT.view by subscription, then up to 12 users of the customer company receive access to these 4 sorting systems.*

STEINERT.view is currently not available for STEINERT LSS, STEINERT ISS and split sorting systems
Please address enquiries about **STEINERT.view** directly to **support@steinertdigital.com**
